

## BEST PRACTICES II

72.1

### 1. TITLE OF THE PRACTICE: Creating Research culture

### 2 OBJECTIVES OF THE PRACTICE:

- ❖ -To established a excellence centre of research,
- ❖ -To promote research culture among the faculty and student.
- ❖ -To promote research culture by encouraging high quality research activities among the faculty and student.
- ❖ -Promote and facilitate collaborative or interdisciplinary research and enhancement of research networking capacity and infrastructure.
- ❖ -Foster excellence and innovation in teaching in the Humanities, Science and Commerce.
- ❖ -Increase and effectively manage the resources and research support for its members.
- ❖ -Contribute to the university's strategic educational and research mission and to support synergies between research, teaching, and learning.
- ❖ -Transfer and mobilize knowledge gained through research for the benefit of society.
- ❖ -Increase the number of publication in indexed journals.

### 3 The Context:

The college is a unit of higher education which aims at providing high quality education at low cost. Gone are the days when academicians can sit in ivory towers and look down upon lesser mortals. The current demand of the society is for the learned to come down to earth and return to the society what they have received in a more beneficial form. The repute of any educational institution rests on teaching – learning process and Research activities. Research therefore is the back bone for the development of the students, teachers and the institution. The college being conscious of this state of affairs, has been giving dynamic thrust towards developing and augmenting the research activities of the college to keep abreast of the advances in the fields of science, commerce and arts. Incubating research aptitude in faculty

members and students has taken priority almost equal to the teaching-learning process. The competency of the students to face the challenges of the society at the end of their tenure will be enhanced not just by their grades and ranks but the ability to apply their knowledge, analyse the problem, synthesize a solution and value the outcome. These skills are developed by working on real time projects during their academic career. In order to direct the students along these lines, the faculty also have to be fully equipped in planning and guiding research. Just as much as the teaching learning process is a partnership between the teacher and the student, so also is the research and development process in which the guide and the researcher have equal role to play. In most P.G.Courses dissertations and projects based on real situations and according to social needs are been completed by students.

The outcome of research should be relevant to the societal needs and a section of the society at least should be direct beneficiaries. Therefore, taking up research activities shapes a person with moral responsibility and a value system that enhances his/ her commitment towards fulfilling the needs of the society. Thus the college wishes to show- case the R&D activities of the college as one of the best practices.

#### **4 THE PRACTICE**

- ❖ Faculty pursuing Ph.D and with Ph. D. degrees are encouraged to attend and present papers in national and international conferences to get exposed to recent and emerging trends in their fields of interest.
- ❖ Eminent researchers are invited to campus for delivering lectures during National and International seminars/ workshops/ conferences organized by the various departments in the college to boost the knowledge level of the faculty and the students.
- ❖ The final year students have to take up and complete project work. Turning this to the advantage of students, the nature of project work assigned to the students is of quality and sometimes a portion of the research work carried out by the faculty members. Such a practice lifts the level of the students to a higher platform of knowledge domain.
- ❖ Memorandums of Understanding have been signed with GBU & I.T.S. engineering college and other agencies and such a practice plays a vital role in interaction of faculty and students with the industries and design

projects in collaboration with them. These Institutions has rich library facilities also which act as catalyst for students in preparing research materials.

#### **5 EVIDENCE OF SUCCESS:**

Eleven departments have been recognized as research centers by C.C.S. University, Meerut since the last cycle of NAAC we have increased research scholars from 2 to 47 .. faculty members have been conferred with Ph. D in the last five years and 4 faculty members are actively engaged in pursuing the degree.

#### **6 PROBLEMS ENCOUNTERED AND RESOURCES REQUIRED:**

- ❖ Sustained motivation of students and faculty is always a challenge
- ❖ Time constraint is a spoke in the wheel, in planning and execution of research specially during formative and summative assessment processes and when other responsibilities are assigned.
- ❖ Timely funds from agencies are always welcome.
- ❖ If the funding agencies can point out the reason for rejecting the proposal or offer suggestions for improvement, it will go a long way in the development to faculty and hence the students.
