## About the Conference

# ANCIENT WISDOM, CIVILIZATIONAL ANTIQUITIES AND THE CONTEMPORARY UNIVERSE

Indian scriptural wisdom, spirituality, architecture and arts abound in the ancient and modern world. Astronomy, Yoga, Astrology, Ayurveda, Naturopathy, The Six Schools of Thought including Vedanta, Buddhism- Jainism have the ability to improve all aspects of our lives. Indeed we could say that India holds a glorious past with a holistic vision for the future. This is also true for the rest of the civilizations as they also possess some unique heritage. A civilizational state, like India is a complex society characterized by urban development, social stratification, symbolic systems of communication and civilizational antiquities. Historically, civilization has often been understood as a larger and more advanced culture, in contrast to smaller, supposedly primitive cultures. Some scholars have described civilization as being necessarily multicultural. The civilizational states including India, Mesopotamia, Egypt, Andes, China, Mesoamerica & Greek etc. are supposed to have arisen independently each having some unique ancient past.

Contemplation over such themes is the need of the hour in order to revive these treasures of our golden past and use them in the modern context, wherever the need is seen or felt. Contemporary universe is much in need of such discussions so that the worth of our past could be visualized in our material world of today.

It is with the aim of bringing these unique antiquities to the surface in order to debate and analyse their relevance today, which this conference intends to target. The aim of this three-day conference is to create a fruitful and synergic environment for deliberation by bringing together intellectuals/ researchers from across the world to have discussions on the main theme/ sub themes and their relevance in the contemporary universe.
